SMSI (Swedish Multi Sector Invoice)

(Based on Global Invoice Message 2.0)

FOREWORD

The global invoice project was started as a joint effort of AIAG, JAMA-JAPIA, and Odette to elaborate a harmonised electronic invoicing message as a common standard for global use in the automotive industry.

Participants in the project team are experts from automotive manufacturers and their suppliers as well as representatives of fiscal authorities, EDI and modelling experts.

Business experts in the project team were interviewed. Based on this information the business process was analysed and UML models of the process and connected activities were created. From these models the necessary data structures were derived.

The EDIFACT - standard was chosen as basis for the final electronic message.

Included in the document are a description of the process and its variants, UML-model diagrams and a message implementation guideline for the EDIFACT message.

SMSI (Swedish Multi Sector Invoice)

SMSI has been developed together by three user organisations in Sweden representing automotive, building & construction and transports. The organisations behind are

Odette Sweden
BEAst, Bygg- och Fastighetssektorns Elektroniska Affärsstandard
Sveriges Transportindustriförbund

The idea behind SMSI is to help in harmonising e-invoicing across business sectors like automotive, building & construction and transports. In every company there is more than one kind of purchasing procedure, some procedures are more general and others are more specialised and linked to a specific business situation. SMSI responds to cross-sector common requirements applied in:

- Purchase for manufacturing with the exception of highly specialised logistics flows
- Purchase of non-production items like supply of office products, maintenance products etc
- Purchase of services like transports
- Billing invoices (telecom services, energy supply services, etc)

The SMSI project started as a joint effort to adapt to the new European legislation on invoicing and VAT. The results are common implementation guidelines for SMSI based on the automotive Global Invoice Message 2.0 and these are published in this document.

Complementary information about this specification is available on the following links:

SMSI (Swedish Multi Sector Invoice)

SECTION 1: INTRODUCTION

The SMSI specification is a cross-sector specification that has been developed by automotive, building & construction and transports sector representatives. SMSI builds on a global automotive specification and therefore some of the wordings in this specification refer back to the original document where many references are made to automotive environment. For the sake of clarification these references have been kept in the SMSI specification, as could be seen in Section 1.

1.1 Problem Statement

1.1.1 Business Opportunity

Any industry can reduce its costs by developing a common recommended business practice through the electronic exchange of Invoice Business Information. By being early to market, we hope to have industry participants adopt this practice.

In the process of supply and usage of goods there is one point in time when one party must accept financial liability for the goods that have been either ordered or received or consumed. The process of generating and transmitting the according statement is called the invoicing process and communicates that funds are due for material/services.

1.1.2 Problem Statement

The data model shall contain these core components that are absolutely essential for the purpose described above. In addition, it will contain all data that might be necessary for legal or business reasons in certain regions, countries, or companies.

Although our final deliverable is an EDIFACT message implementation guideline, the technology of describing the process and data also enables any interested organisation or party to derive other compatible EDI-structures, for instance, XML-Schemas.

1.1.3. Scope

The project describes the invoicing process and its variants. It considers the legal statement and, to a certain extent, arguments or corrections of an invoice. It does not explain thoroughly the process that leads to a business relationship between the parties and the actual supply.

In detail the following functions will be in the scope of the INVOIC business domain:

- Traditional, supplier initiated invoice
- Self-billing invoice

The following tasks will **not** be in the scope of the INVOIC business domain:

- Reconciliation of an inaccurate invoice (commercial dispute)
- European and North American payment/remittance procedures

Compared with Global Invoice version 1, the following major changes / extensions apply:

- Additional information according to the Sixth European Union directive regarding tax exemption and special procedures.
- Several references to other business documents have been added on header and item level to enhance the business process traceability.
- The Tax Representative Party has been added.

1.1.4. References

- UN/EDIFACT INVOIC Message (D03A)
- UN/CEFACT's TMWG N090 Unified Modelling Methodology

SMSI (Swedish Multi Sector Invoice)

1.2 Introduction to the Modelling Approach

This specification is based on a modelling approach. However in this version the model is not presented due to formal reasons. There are still some Change Requests on the Global Invoice V2 message that have not yet been formally approved. Chapter 2 and 3 are therefore excluded in this version of the document and will be published later.

In a continuous effort to attain global EDI harmonisation using UN/EDIFACT messages, this document is based on UN/CEFACT N090 Unified Modelling Methodology. The N090 guideline provides a process for message development with the facilitation of UML.

The initial step is to create Business Domain Use Case Diagrams.

From these diagrams, Use Case Descriptions are constructed that lead to the Activity Diagram. Once these works are complete, with the means of data –modelling, the data structure for generating user documentation and technical specifications is created. This data model can be translated into UN/EDIFACT syntax, XML, and future data exchange formats.

The project also used the Business Process Worksheet templates recommended by UN/CEFACT's BPMWG.

1.3 Stake holder's Needs

Customer Expectations

- Trading partner agreements must be established. This includes the transport protocol that is vital in understanding the wrappers/enveloping, response requirements, syntax, and message format.
- Accept liability only for material /service provided according to orders sent and prices agreed upon.
- Generation of a business document that fulfils all legal and tax requirements
- Reliable flow of business instructions, material and/or services as necessary for the ongoing production process.

Supplier Expectations

- Trading partner agreements must be established. This includes the transport protocol, which is vital in understanding the wrappers/enveloping, response requirements, syntax of the message, and message format.
- Being accurately paid for material and service.
- Generation of a document that fulfils all legal and tax requirements.
- Reliable flow of business instructions in order to enable the sales and delivery of material and/or services on an established contractual base. This information must also conform to legal requirements in order to enable the invoicing process and financial claims.

Stakeholders Outside of the Business Domain

Anyone not involved in the financial reconciliation process is outside this domain, such as engineering and manufacturing related personnel.

SMSI (Swedish Multi Sector Invoice)

SECTION 2: BUSINESS PROCESS MODEL

This section will be published later.

SMSI (Swedish Multi Sector Invoice)

SECTION 4: UN/EDIFACT MESSAGE IMPLEMENTATION GUIDELINE

The message implementation guideline describes how the semantic content is being applied to the D.03A UN/EDIFACT standard message INVOIC.

It contains four different reports:

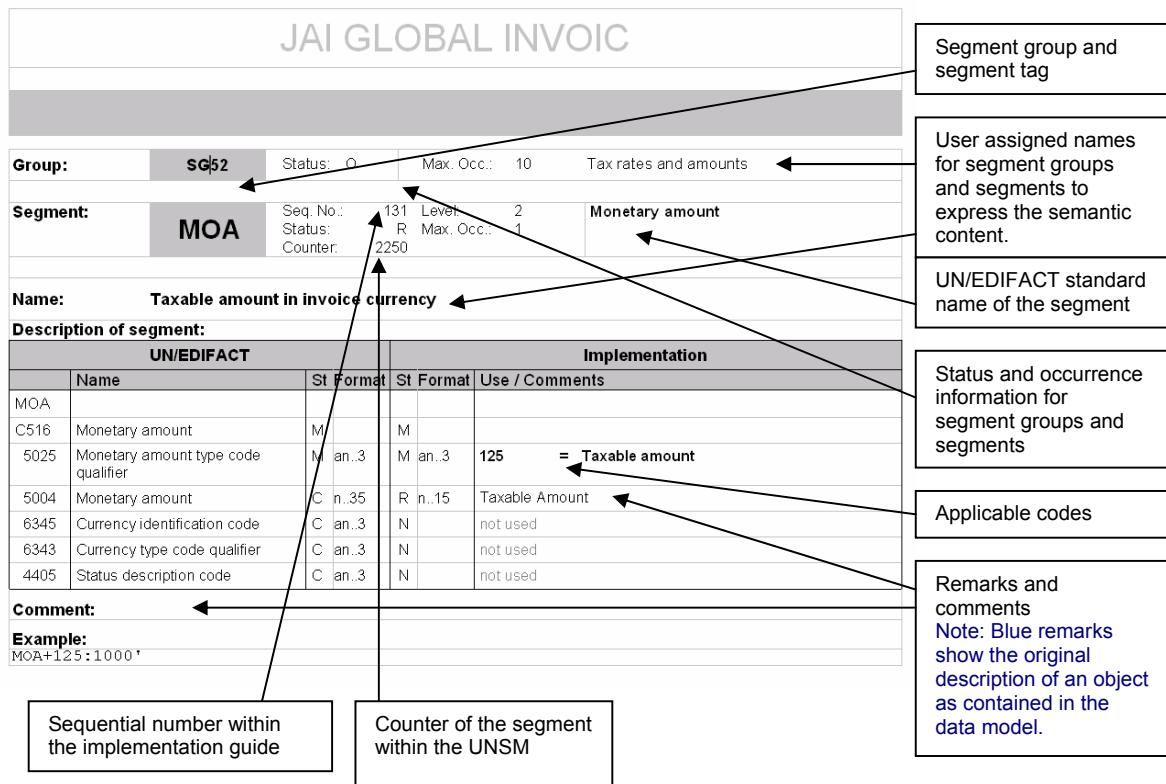

- A structure / table of contents report, which gives an overview of the segments and segment groups used in the message and their semantic usage.
- A branching diagram, which displays the structure in a different view.
- A segment details report, which explains the used segments in detail.
- A code lists report, which lists for each coded data element the applicable codes within the framework of this implementation guideline.

The original status information assigned by the UN/EDIFACT standard is expressed as follows:

UN/EDIFACT	Implementation
Status M	M - mandatory within the scope of next higher hierarchy level (composite data element, segment, segment group, or message) N - not used (applies only to component data elements), due to be subordinate to a not-used composite data element this component data element is not used
Status C	R - required within the scope of next higher hierarchy level (composite data element, segment, segment group, or message) O - optional within the scope of next higher hierarchy level (composite data element, segment, segment group, or message) D - depending; rules are described in the comment N - not used

UN/EDIFACT Message: Segment details

Group: **SG2** Status: R Max. Occ.: 1 Seller
SU = SE

Segment: **NAD** Seq. No.: 49 Level: 1 **Name and address**
Status: M Max. Occ.: 1
Counter: 0230

Name: **Seller**

Description of segment:

UN/EDIFACT			Implementation	
	Name	St Format	St Format	Use / Remarks
NAD 3035	Party function code qualifier	M an..3	M an..3	The usage of SE is recommended. For compatibility reasons also SU is supported. Both codes are considered to express the same semantic content. SE - party selling merchandise to a buyer. SU - party which manufactures or otherwise has possession of goods, and consigns or makes them available in trade. SE = Seller SU = Supplier
C082	Party identification details	C	O	In most cases it will be sufficient to use C082 for identification of seller. If not, either C058 (unstructured address) or C080 and following data elements should be used (structured address). The preferred version is the structured address. Special remarks: In some countries, i.e. the UK, the full name and address of the Seller must be shown on tax invoices. In the UK however, where such documents are transmitted electronically, in batched files, HM Customs accepts that the full name and address of the Buyer need only be shown once per file, rather than on each invoice - in the UK, this is accommodated within the TAXCON (TAX CONtrol) summary message, which is sent (in a batched interchange) after the last UNH thru' UNT invoice, but before the UNZ service segment. Unless provision is made elsewhere within the message or interchange for the transmission of full name and address (eg use optional segment 16 NAD - Buyer as officially registered), HM Customs will require the preferred composite C058 (structured names/addresses) also to be used.
3039 1131 3055	Party identifier Code list identification code Code list responsible agency code	M an..35 C an..17 C an..3	R an..35 N R an..3	not used 5 = ISO (International Organization for Standardization) 10 = ODETTE 16 = US, D&B (Dun & Bradstreet Corporation) 91 = Assigned by seller or seller's agent 92 = Assigned by buyer or buyer's agent 167 = US, AIAG (Automotive Industry Action Group) 289 = JIPDEC/ECP (Japan Information Processing Development Center / Electronic Commerce Promotion Center) 9 = EAN International (GS1) For usage see comment on C082.

5402	Currency exchange rate	C n..12	O n..12	Currency Conversion Rate
6341	Exchange rate currency market identifier	C an..3	N	not used

Comment:

If the invoicing currency is the official domestic currency, this segment group can be omitted (this may depend on national fiscal requirements). Otherwise it is used to state the necessary currencies.

It has to contain the invoice currency and may contain home or payment currency.

Invoicing currency is always to be given in the first occurrence of the CUX segment, C504#1 as follows:
6347 '2', 6345 Currency, 6343 '4'

If a different payment or home currency is to be given, the second occurrence of C504 in the CUX segment is to be used as follows:

second 6347: '3', second 6345 contains the currency, and second 6343: '3' or '11'. Data element 5402 contains the currency conversion rate.

If three currencies have to be transmitted, another SG7 - CUX, DTM has to be created and the following rule shall apply:

SG7#1 CUX C504#1: invoice currency (see above)

SG7#1 CUX C504#2: payment currency (see above)

SMSI (Swedish Multi Sector Invoice)

UN/EDIFACT Message: Segment details

SG7#2 CUX C504#1: home currency (see below)
6347 '3' 6345 Currency 6343 '3'

Home currency: in some countries it is a requirement that, for invoicing in foreign currency, the invoice taxable and tax (e.g. VAT) amounts must also be expressed in home currency. Relating this to the CUX segments, authorities would require the invoicing currency and the home currency to be shown, together with the rate of exchange (element 5402) used.

Example:

CUX+2:EUR:4+3:SEK:11+9.987 '

SMSI (Swedish Multi Sector Invoice)

Segment: PCD **Seq. No.:** 83 **Level:** 2 **Percentage details**
Status: D **Max. Occ.:** 1
Counter: 0460

Name: Discount, payment or instalment percentage

Description of segment:

UN/EDIFACT			Implementation		
	Name	St Format	St Format	Use / Remarks	
PCD					
C501	Percentage details	M	M		
5245	Percentage type code qualifier	M an..3	M an..3	Payment Variation Qualifier Code 7 must be used in conjunction with code 262 in the following MOA segment, DE 5025. Code 12 must be used in conjunction with code 52 in MOA, DE 5025. Code 122 requires code 77 in the MOA segment. Code 122 is used to indicate the percentages of the total payment that is covered by the payment means, which is specified in the triggering PYT segment. 7 = Percentage of invoice 12 = Discount 15 = Penalty percentage 122 = Percentage of total payment	
5482	Percentage	C n..10	R n..10	Payment Variation	
5249	Percentage basis identification code	C an..3	N	not used	
1131	Code list identification code	C an..17	N	not used	
3055	Code list responsible agency code	C an..3	N	not used	
4405	Status description code	C an..3	N	not used	

Comment:

This segment specifies - dependent on qualifier of leading PYT segment - the discount percentage or the percentage of an invoice that an instalment is based on. The following MOA segment has to match this percentage, if given.

SMSI (Swedish Multi Sector Invoice)

UN/EDIFACT Message: Segment details

Group: SG26 **Status:** R **Max. Occ.:** 9999999 Line item section

Segment: MEA **Seq. No.:** 97 **Level:** 2 **Measurements**
Status: D **Max. Occ.:** 1
Counter: 1140

Name: Article net weight

Description of segment:

UN/EDIFACT			Implementation		
	Name	St Format	St Format	Use / Remarks	
MEA					
6311	Measurement purpose code qualifier	M an..3	M an..3		
C502	Measurement details	C	R	PD = Physical dimensions (product ordered)	
6313	Measured attribute code	C an..3	R an..3	AAL = Net weight	
6321	Measurement significance code	C an..3	N	not used	
6155	Non-discrete measurement name code	C an..17	N	not used	
6154	Non-discrete measurement name	C an..70	N	not used	
C174	Value/range	C	R		
6411	Measurement unit code	M an..8	M an..8	Typically the measure unit used in other MEA segment concerning the weight shall be the same as the unit given here.	
6314	Measure	C an..18	R n..18	not used	
6162	Range minimum quantity	C n..18	N	not used	
6152	Range maximum quantity	C n..18	N	not used	
6432	Significant digits quantity	C n..2	N	not used	
7383	Surface or layer code	C an..3	N	not used	

Comment:

All article weights should be specified in the same measure unit. Each weight is transmitted in a specific occurrence of the MEA segment where data element 6411 is mandatory in composite C174. This data element should inherit the value of the measure unit common to all article weights.

Use when available

SMSI (Swedish Multi Sector Invoice)

UN/EDIFACT Message: Segment details

Group: SG26 **Status:** R **Max. Occ.:** 9999999 Line item section

Segment: DTM **Seq. No.:** 101 **Level:** 2 **Date/time/period**
Status: D **Max. Occ.:** 2
Counter: 1180

Name: Delivery date

Description of segment:

UN/EDIFACT			Implementation		
	Name	St Format	St Format	Use / Remarks	
DTM	Date/time/period	M	M		
C507	Date or time or period function code qualifier	M an..3	M an..3	Code 2 - requested delivery date supplier to buyer in this transaction (e.g. tier 2 to tier 1) Code 191 - the delivery date the buyer has to meet towards his own customer (e.g. tier 1 to OEM) EAN 35	
2005				2 = Delivery date/time, requested 191 = Delivery date/time, expected 35 = Delivery date/time, actual	
2380	Date or time or period text	C an..35	R n..14		
2379	Date or time or period format code	C an..3	R an..3	8 = CCYYMMDD 9 = CCYYMMDDPP 102 = CCYYMMDD 203 = CCYYMMDDHHMM 204 = CCYYMMDDHHMMSS	

Comment:

The delivery date requested is the date the buyer has asked the supplier for shipment. If the buyer itself is e.g. a tier 1 supplier (supplier would be tier 2), in addition another delivery date might be specified - the delivery date the tier 1 has to meet towards the OEM.

Segment: MOA **Seq. No.:** 140 **Level:** 1 **Monetary amount**
Status: M **Max. Occ.:** 1
Counter: 2210

Name: Invoice amount in invoicing currency

Description of segment:

UN/EDIFACT			Implementation	
	Name	St Format	St Format	Use / Remarks
MOA	Monetary amount	M	M	
C516	Monetary amount type code qualifier	M an..3	M an..3	Although the EDIFACT codelist provides another code for the sum of several invoice documents (e.g. in a summarised message like an invoice trailer) for the sake of keeping the message as simple as possible the code 77 shall be used also in those messages. Qualifier 388 is used in Japan in case of the detailed line item invoice (including SG 49 for the different shipments). This invoice is usually issued once a month.
5025				9 = Amount due/amount payable 77 = Invoice amount 131 = Total charges/allowances 388 = Total amount including Value Added Tax (VAT) 86 = Message total monetary amount 129 = Total amount subject to payment discount
5004	Monetary amount	C n..35	R n..15	Invoice Amount
6345	Currency identification code	C an..3	O an..3	
6343	Currency type code qualifier	C an..3	D an..3	Amount Currency Qualifier If invoicing currency is used, the DE6343 with code 4 can be omitted. If additional home currency is transmitted, for the MOA containing the come currency amount the value 3 in DE6343 is required.
4405	Status description code	C an..3	N	4 = Invoicing currency not used

Comment:

Total sum charged in respect of a single invoice in accordance with the terms of delivery.

Invoice amount (77) is the sum of:

line item amounts (Qualifier 79)

plus total invoice additional amount (136)

plus total duty/tax/fee amount (176)

less payment discount amount (109)

plus or less adjustment amount (165)

Relation between Home Currency and Invoicing Currency is established through data element 5402 (rate of exchange) in the CUX segment at header level.

If the amount is stated in the invoicing currency, the currency type qualifier is optional. For (additional) home and payment currency it has to be stated.

Beast: Koder som används i totalen är. 9,77,99,86,125,129,131,136,165,176 kolla på vilka koder som, skall användas..

Name: **Invoice amount in home currency**

Description of segment:

UN/EDIFACT			Implementation		
	Name	St Format	St Format	Use / Remarks	
MOA	Monetary amount	M	M		
C516					
5025	Monetary amount type code qualifier	M an..3	M an..3	Amount Type Although the EDIFACT codelist provides another code for the sum of several invoice documents (e.g. in a summarised message like an invoice trailer) for the sake of keeping the message as simple as possible the code 77 shall be used also in those messages. 77 = Invoice amount	
5004	Monetary amount	C n..35	R n..15		
6345	Currency identification code	C an..3	O an..3		
6343	Currency type code qualifier	C an..3	R an..3	Amount Currency Qualifier 3 = Home currency 11 = Payment currency	
4405	Status description code	C an..3	N	not used	

Comment:

Total sum charged in respect of a single invoice in accordance with the terms of delivery.

When amounts have to be specified by legal reasons also in home currency, this segment has to be sent.

If the amount is stated in the invoicing currency, the currency type qualifier is optional. For (additional) home and payment currency it has to be stated.

Example:

MOA+77:824.76::3'

SMSI (Swedish Multi Sector Invoice)

UN/EDIFACT Message: Segment details

Group: **SG50** Status: D Max. Occ.: 1 Total taxable amount in invoicing currency

If no taxes or duties apply to any part of the invoice this occurrence of SG50 can be omitted. For transactions with European partners this SG50 might be required by legal reasons even if only zero rate taxes apply to the invoiced items.

6343	Currency type code qualifier	C an..3	R an..3	Amount Currency Qualifier	
4405	Status description code	C an..3	N	4 = Invoicing currency	
				not used	

Comment:

In some countries the invoice amount is always rounded to full currency units (e.g. SEK in Sweden). The sum of all line item amounts + or - allowances, charges, taxes does often not equal to this rounded invoice amount. In this case, an adjustment amount might be necessary to explain the difference.

Example:

MOA+165:0.26::4'

1227	Calculation sequence code	C an..3	N	not used

Comment:

When sending a message with data element 5278 in the TAX segment, the tax rate (numeric) should be presented in an alpha-numeric field as follows: 19.5% ==> :19.5

In European business environment, it is recommended to use SG52 as well to summarize line items belonging to the same exemption category. Assuming an invoice with a mixture of line items (1000 EUR) subject to VAT and line items (1000 EUR) subject to tax exemption, the following example would explain the recommendation:

```

SG50: Total invoice amount (MOA+77) 2160.00 EUR
SG50: Total taxable amount (MOA+125) 1000.00 EUR
SG50: Total tax amount (MOA+176) 160.00 EUR
SG50: Total exemption amt (MOA+403) 1000.00 EUR
SG52: Tax rate and amounts - VAT
SG52: Tax rate and type (TAX+7) 16% VAT
SG52: Taxable amount (MOA+125) 1000.00 EUR
SG52: Tax amount (MOA+124) 160.00 EUR
SG52: Tax rate and amounts - exempt code AAA
SG52: Tax rate and type (TAX+7) 0% AAA (exempt ...)
SG52: Taxable amount (MOA+125) 1000.00 EUR
SG52: Tax amount (MOA+124) 0.00 EUR
    
```

Example:

TAX+7+VAT++++:::16+S'

SECTION 5: BUSINESS FUNCTIONS COVERED BY THE MESSAGE

The invoicing process contains at least the invoice itself (either issued by seller or as a self-billed invoice issued by the buyer). The corrective action has to be taken by other means.

In some countries it is usual or even required to send a paper based summarized statement. This statement will be used mostly for tax reporting reasons.

SMSI (Swedish Multi Sector Invoice)

UN/EDIFACT Message: Segment details

5.1 Invoice Profile

5.1.1 This message covers the invoicing function using one of the following processes.

- Classic invoicing: The message is sent by the seller to the buyer claiming payment for goods despatched under mutually agreed conditions.
- Self-billing: The message is sent by the buyer to the seller to settle payment for goods despatched under mutually agreed conditions. The buyer will arrange for payment according to agreed conditions.

One invoice must refer to one order from the buyer and one or more despatch advices.

An invoice may refer to or (R) = Required):

- Buyer in following roles (R)
 - One buyer
 - One buyer as officially registered
 - One ship-to on header level
- Seller in following roles (R)
 - One seller
 - One seller as officially registered
- Third parties (R)
 - One pay-to
- One payment means
- One payment condition
- One set of currency information including a specific VAT amount currency (home currency) when different from the invoice currency (R)
- General information
- One set of legal and fiscal information
- One or more payment terms
- Different goods supplied in one or several despatches (R)
- Quantities, prices and different sums (R)
- One or more allowances/charges at article line level agreed between Buyer and Seller
- Article or allowance/charge (Used upon agreement) related to more than one VAT category and rate.
- An invoice may contain adjustments related to prices/amounts to avoid differences caused by fractions (e.g., used in Sweden)
- VAT exempt for crossborder between different EU countries.

SMSI (Swedish Multi Sector Invoice)

UN/EDIFACT Message: Segment details

5.1.2 Invoicing EU Directive 77/388/EC

Since 20040101 a new Invoicing directive was implemented in EU. Required information in this directive was defined and has to be used in all EU countries. This information has been stated in the specifications as Required in EU. Other countries outside EU should also send this information due to harmonise the specification.

Due to simplify the use of Tax Exemption Reason, a codelist have been created for this purpose. Should be used for crossborder between different EU countries.

AAA Exempt – Article 15 of Directive 77/388/EC

Exemption of exports from the Community and like transactions and international transport.

To be used when invoicing goods which are delivered to a non-EC country and when invoicing certain services, where these are directly connected with the export of goods.

AAB Exempt – Article 16 of Directive 77/388/EC

Special exemptions linked to international goods traffic.

To be used when invoicing goods which are imported from a non EC country into an approved warehouse, or free zone, within the EC area, and held in warehouse under VAT suspension. This arrangement may also include VAT suspended goods movements between different approved warehouses within the EC provided that the goods are re-exported from the warehouse to a non-EC country.

Example: a company in EC country A imports goods from US and stores them in an approved warehouse, under VAT suspension. The EC company A then sells the goods to a company in EC country B and transfer the goods from the warehouse in country A to a warehouse in country B, still under VAT suspension.

Then the company in country B sells and delivers the goods to a company in Russia.

AAC Exempt – Article 28c(A) of Directive 77/388/EC

Exempt Intra-Community supplies of goods.

To be used when invoicing goods which are delivered from one EC country to another EC country if the customer has a VAT number in another EC country.

The goods have to be dispatched or transported by or on behalf of the vendor or the person acquiring the goods.

AAE Reverse Charge – Article 28b(C) (D) (E) (F) of Directive 77/388/EC

Reverse Charge Intra-Community transport services.

To be used when invoicing the transport of goods within the EC and ancillary services to these transports, services rendered by intermediaries, services on movable tangible property, where the customer is registered for VAT in a different EC country to that of the supplier.

AAF Exempt – Article 26b(B)) of Directive 77/77/388/EC

Exemption under the special scheme for investment gold.

To be used when invoicing investment gold to a customer in another EC country, where the special scheme for investment gold is applicable.

AAG Exempt – Article 13 of Directive 77/388/EC

Exempt within the territory of the country.

SMSI (Swedish Multi Sector Invoice)

UN/EDIFACT Message: Segment details

To be used when invoicing, within the supplier's own country, goods and services that are exempt from VAT under the national legislation – e.g. banking-, insurance services, hospital care, medicine and education.
AAH Margin Scheme – Article 26a of Directive 77/388/EC Special arrangements applicable to second-hand goods, works of art, collectors items and antiques. To be used when invoicing second-hand goods, works of arts, collector's items and antiques where the margin scheme is applicable.
AAI Margin Scheme – Article 26 of Directive 77/388/EC Margin scheme for travel agents To be used when invoicing for travel arrangements where the margin scheme for travel agents is applicable.
AAJ Reverse Charge – Article 26b(F) of Directive 77/388/EC Reverse charge procedure applying to supplies of gold. To be used when the supplier of the investment gold, which would otherwise be exempt from VAT, has exercised the right to “option to tax”, under the Article 26b(C) of directive 77/388/EC. Under this “option to tax” arrangement, the customer is liable to account for VAT on supply, under the reverse charge procedure.
AAK Reverse Charge – Article 21 1.a of Directive 77/388/EC Reverse charge procedure. Special scheme for non VAT registered companies within an EC country in case of domestic supply of goods and services to a VAT registered purchaser in that EC country. To be used when invoicing goods and certain services, from a supplier (a foreign entity) who is not established and registered for VAT in an EC country, to a customer who is VAT registered in that EC country.
AAL Reverse Charge Exempt - Article 16 (1) 2 nd subparagraph of Directive 77/388/EC Reverse charge procedure when goods cease to be covered by warehousing arrangements. To be used when invoicing goods from a non-EC country which have been held in an approved warehouse and should be removed for consumption in an EC country (i.e. not re-exported as in AAB). <i>Example: still using the example above (AAB) as a base the company in country A sells and transfers the goods to a company in country B but in this case the company in country B sells and deliver the goods to EC country C for domestic consumption.</i>
AAM Exempt New Means of Transport – Article 28a(2) of Directive 77/388/EC Intra-Community supply of a new means of transport. The following information is required on the invoice for an Intra-Community supply of a New Means of Transport: a) the chassis number, or VIN (vehicle identification) number and the vehicle registration number, if it is a nearly-new vehicle that has been registered in the “exporting” Member State, b) the price paid, c) the value of any accessories that have been supplied (over and above the price for the vehicle). (During the vehicle registration process in the “importing” Member State, the price paid, plus the value of any accessories supplied, will be used for the purposes of calculating the VAT due.)

SMSI (Swedish Multi Sector Invoice)

UN/EDIFACT Message: Segment details

To be used when invoicing a supply of new means of transport to a customer in another EC country.
AAN Exempt Triangulation – Article 28c(E)(3) of Directive 77/388/EC Triangulation To be used when invoicing by a company who is the middleman in a triangulation chain i.e. goods trade between three parties in different EC countries and the goods delivered from the first part to the last part.
AAO Reverse Charge – Article 9.2.e of Directive 77/388/EC Reverse charge procedure for services such as consultant, lawyer, information, ADB and translation. To be used when invoicing taxable services for example consultant-, lawyer-, auditor-, translation- and information services, ADB and preparing systems and programs, advertising to EC countries and certain non EC countries.
